Get to know your Smart Battery

The Shadowspec App

Download the Shadowspec App to your smart device to get full control over your Smart Battery. Visit our website for links or search for Shadowspec on Google Play or the App Store.

You can adjust the brightness, pair multiple umbrellas and turn them on and off right from your device.

Tip: the default password for the controller is **12345678**

Important Things to Remember

1. Only use the supplied Shadowspec Charger Adaptor to charge the Shadowspec Smart Battery.
2. Do not charge the Battery when it is fitted to the umbrella.
3. Always charge the Battery indoors, in a dry safe environment.
4. Do not puncture the Battery as it contains a Lithium Ion Battery.
5. Do not store the Battery on the umbrella when not in use.

Specifications

Shadowspec LED-Light *(Unity and Serenity Models)*

Input Voltage: 9V DC
Power Consumption: 900mA
Socket Polarity: tip + | ring -

Shadowspec Charger

Input Voltage: 100V-240V AC
Output Voltage: 24V @ 1000mA
Plug Polarity: tip + | ring -

Install Your Smart Battery

Step 1: Slide the Smart Battery in

Step 2: Plug the LED light into the Battery

1. Slide the Battery onto the Main Spar of your umbrella at the LED light End.
2. Plug the LED light Cable into the Battery.
3. Press the button to turn on your Shadowhub LED light, or open up the Shadowspec app on your smart device to control the Smart Battery.

To remove the battery for storage, reverse the above steps.

Operate your Light

The Function Button also serves as a pilot light indicating battery and / or charging status. The LED light can be operated by pushing this button or via the Shadowspec App on your smartphone.

Button function:

Push once	<i>Light on - 100% full power (brightness).</i>
Push again	<i>Light on - 50% full power (brightness).</i>
Push again	<i>Light (stand-by mode to accept Bluetooth commands).</i>

Battery status light function:

Red Light on	<i>Unit Charging</i>
Green Light on	<i>Unit Charged</i>
Red Light flashing	<i>Battery requires charging</i>

Tips & Troubleshooting

The LED Light won't come on:

Charge your battery using the provided Shadowspec Charger.

The Battery is charged but Light is no longer working:

Please note that the Battery will shut down if it discharges below a minimum threshold; this protects the battery from permanent damage. Please charge the battery.

1. Check the battery plug is attached to the Smart Battery.
2. Hold the button for 10 seconds to reset the Smart Battery.

Mobile Application won't detect the device:

Unit is fully discharged and not in Stand-by mode.

Smart Battery Care

- Please remember to charge your Smart Battery before it is used.
- Your Battery should not be stored for long time periods when fully charged or uncharged.
- Optimum long-term storage condition is between 40%-50% charged.
- Do not expose the Smart Battery to temperatures higher than 55°C.
- Do not dispose of the Smart Battery via normal trash disposal. Please recycle responsibly.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
